### DETAILED ACTION

**Claims 1-12 are pending.**

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to the compound dye having the formula as depicted in claim 1 where all of the radicals, R, X- and Y are as defined, classified in class 546, subclass 184.
- II. Claims 7-12, drawn to the method of measuring the cellular properties by entry of a fluorescent dye into a cell, comprising utilizing a dye of claim 1, classified in class 546, subclass 184.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using the product (MPEP 806.05(h)). In the instant case, the process as claimed can be practiced with another materially different product, bodipy. See Ca 121:296362.

Therefore, restriction is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1625

Claims 1-11 are generic to a plurality of disclosed patentably distinct species comprising R, X', Q, Y, Z. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Attorney Moran on 6/11/04 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. The applicant also elected the species of claim 6 for searching purposes. Claims 7-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

The applicant traverses the restriction requirement. However, Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using the product (MPEP 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product as demonstrated throughout the specification and

Art Unit: 1625

in claims 33 –38 which are directed to several different methods of using the product, for example treating diabetes and treating inflammation. In the instant case, the process as claimed can be practiced with another materially different product, bodipy. See Ca 121:296362. Therefore, restriction is proper. The restriction is made FINAL.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. Claims 1-6 are indefinite because they are not written in proper format for a compound claim. The phrase “Unsymmetrical methane and polymethine dyes” is ambiguous. A compound by definition consists of one compound, not two or more compounds. Is the applicant claiming a composition mixture of methanes and polymethines or a compound claim?
